Mathematical and numerical modelling in electrical engineering: Theory and applications. M. Krizek and P. Neittaanmäki Mathematical and Numerical Modelling ISI Journal Title Abbreviations Nonsmooth optimization: analysis and algorithms with applications to . Mathematical and numerical modelling in electrical engineering theory and applications. E E 215 Fundamentals of Electrical Engineering (4) NW . Prerequisite: either MATH 136, MATH 307, or AMATH 351, any of which may be taken Physics, characteristics, applications, analysis, and design of circuits using . Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs.
