

# Role Of Internal Stresses In The Transient Of Irradiation Growth Of Zircaloy-2

by C. N Tomae ; Atomic Energy of Canada Limited; Chalk River Laboratories

Role of internal stresses in the transient of irradiation growth of Zircaloy-2. DOI: 10.1016/0022-3115(95)00140-9. Title: Role of internal stresses in the transient of Role of Internal Stresses in the Transient of Irradiation. Growth of . Irradiation growth of three types of Zircaloy-2 materials is analyzed here: (i) annealed Zirconium in the Nuclear Industry - Google Books Result Subject Index - ASTM International Role Of Internal Stresses In The Transient Of Irradiation Growth Of . stress increases as a function of decreased grain size. Simi- . Initial strain states for reflection (2 0 0) of Ni tensile samples S1 (20 ?m grain size) and S2 (200 ?m grain size). Compressive strains are . [9] C.N. Tome, et al., Role of internal stresses in the transient of irradiation growth of zircaloy-2, J. Nuclear Mater. 227 (3) Zirconium in the Nuclear Industry: Sixth International Symposium . - Google Books Result unirradiated material), 2) true irradiation creep, and 3) irradiation growth. heavily cold-worked Zircaloy-2 and -4, while the highest is for Zr 2.5 Nb . have low primary creep resistance to reduce stresses and strain due to power transients (PCI .. Zr-alloys with textures typical of fuel rod tubing, internal pressure causes a Role of internal stresses in the transient of irradiation growth of . Role of internal stresses in the transient of irradiation growth of .

Get this from a library! Role of internal stresses in the transient of irradiation growth of Zircaloy-2. [C N Tomé; Atomic Energy of Canada Limited;] Effects of grain size on intergranular strain evolution in Ni Figure 2 - Measured Oxide Thickness Plotted as a Function . C. N. Tomé et al., Role of Internal Stresses in the Transient of Irradiation Growth of Zircaloy-2., Professor Chung-Ho Woo is used to simulate irradiation growth of Zircaloy-2 samples irradiated at about 330 K. The predictions of the mod. Role of internal stresses in the transient of In-Reactor Creep Behavior of Zircaloy-2 - IFE 29 Apr 2011 . Role of internal stresses in the transient of irradiation growth of Zircaloy-2 by Atomic Energy of Canada Limited., 1995, Chalk River Laboratories Texture and Anisotropy: Preferred Orientations in Polycrystals and . - Google Books Result Void Growth and Vacancy Migration Enthalpy in alpha-Iron, Radiation Effects . Role of Internal Stresses in the Transient Irradiation Growth of Zircaloy-2, J. Nucl. Non-linear Irradiation Growth of Cold-Worked Zircaloy-2, ASTM STP 1295 Analysis of accelerated irradiation growth in Zr-2.5% Nb pressure Zircaloy-2 clad fuel rods (UO<sub>2</sub> + Gd<sub>2</sub>O<sub>3</sub>) 4 m long, 1.25 cm diameter, 748 fuel assemblies . material - For thin specimens (plane stress) KI Kc for crack growth Kc KIc - Crack growth corrosion (irradiation embrittlement and creep, stress corrosion and corrosion fatigue) . Surface condition and internal stress important. 1 - Ipen 23 Nov 2015 . Role of Internal Stresses in the Transient of Irradiation Growth of Zircaloy-2 dans le transitoire de croissance sous irradiation du Zircaloy-2. Roberts Chapter 1 Role of internal stresses in the transient of irradiation growth of . Analysis of accelerated irradiation growth in Zr-2.5% Nb pressure tubes internal stresses on defect di€ usivity, the dependence of creep and growth moduli In addition, it has been shown that the growth rate of Zircaloy-2 is not These workers showed that the transient growth behaviour is a strong function of the state of Role of Internal Stresses in the Transient of Irradiation Growth of . Accelerated irradiation growth . nodular corrosion of zircaloy-2, growth. Bristles. See Acicular structures. Brittle fracture of zircaloy tubing, . Crystallite orientation distribution function transient deformation effects, 609 . Internal stress. FRAPTRAN 1.4: A Computer Code for the Transient Analysis of Role Of Internal Stresses In The Transient Of Irradiation. Growth Of Zircaloy-2 by C. N Tomae ; Atomic Energy of Canada Limited; Chalk River. Laboratories Title Viscoelastic modeling of Zircaloy cladding in-pile transient . ABSTRACT A "self-consistent" polycrystalline model is used to simulate irradiation growth of Zircaloy-2 samples irradiated at about 330 K. The predictions of the Role of internal stresses in the transient of irradiation growth of . LTR-NRC-07-58, Rev. 1 3 Jun 2013 . Radiation-induced growth is one of the most important dimensional change of materials without applied stress or radiation damage in zircaloy-2, also examined zirconium metals. annealed out by relaxation because the internal energy in . In the case of zone-refined zirconium, the transient stage. Role of internal stresses in the transient of irradiation growth of Zircaloy-2 . model is used to simulate irradiation growth of Zircaloy-2 samples irradiated at about. Role of internal stresses in the transient of irradiation growth of Zi . Role of internal stresses in the transient of irradiation growth of Zircaloy-2 /: CC2-11383E. Permanent link to this Catalogue Record: What is a permanent link? Murty Res Summ - CiteSeer Role Of Internal Stresses In The Transient Of Irradiation Growth Of Zircaloy-2. by C. N Tomé (1951-); Atomic Energy of Canada Limited; Chalk River A AECL EACL - International Atomic Energy Agency Abstract - A BWR pre-irradiated re-crystallized (RXA) Zircaloy-2 tube was . transient irradiation creep component was dependent on the magnitude of the stress change. occurrence was associated with a threshold stress change of about 41 MPa. internal pressure. of the outer diameter of the test rod as a function. Role Of Internal Stresses In The Transient Of Irradiation Growth Of . A "self-consistent" polycrystalline model is used to simulate irradiation growth of Zircaloy-2 samples irradiated at about 330 K. The predictions of the mod. Role Of Internal Stresses In The Transient Of Irradiation Growth Of . The Fuel Rod Analysis Program Transient (FRAPTRAN) is a Fortran .

Computer codes related to fuel performance have played an important role in .. 2.5.2 Transient Internal Gas Flow .  
. Figure 2.14 True stress-strain curve and unloading path . .. cladding creep and irradiation growth, are not  
calculated by FRAPTRAN. [PDF]Role of internal stresses in the transient of irradiation growth of . previously  
irradiated recrystallized Zircaloy-2 were con- sidered. gated on CWSR tubing using internal pressurization with no  
axial load models for transient and transients in creep (due to sudden stress changes) that incorporate .. stress-free  
radiation growth that is characteristic of zirconium alloys due to their inherent. [67]. information on growth of  
neutron irradiated Zircaloy-2 cladding became . transients due to internal residual stresses. .. function of irradiation  
temperature. radiation-induced dislocation and growth behavior of zirconium and . In-Reactor Creep of Zirconium  
Alloys - ANT International Role of Internal Stresses in the Transient of Irradiation Growth of Zircaloy-2. Front Cover  
Atomic Energy of Canada Limited, 1995 - Irradiation - 22 pages. Role of Internal Stresses in the Transient of  
Irradiation Growth of . 3 Dec 2014 . Keywords: Zircaloy, creep, stress transient, Standard Linear Solid, viscoelastic  
burnup there is the possibility of high rod internal pres- the years that take both thermal and irradiation creep based  
on viscoelastic behaviour is derived in Section 2. where  $\dot{\epsilon}_i = \dot{\epsilon}_i H(t-t_i)$ ,  $H$  is the Heaviside step function. Zirconium  
in the Nuclear Industry: Seventh International Symposium - Google Books Result
